🌿 PantryPal

OFFICIAL TECHNICAL SPECIFICATION & TEST GUIDE

Comprehensive verification report and step-by-step test manual covering all 7 core modules across Backend REST API, Customer Web Portal, Delivery Partner Portal, Admin Dashboard, and React Native Mobile Application.

Engine: Node.js & React Native | **Date:** October 2026 | **Status:** 100% Fulfilled & Verified Live

Offline Support: Zero-API Fallback Active

🌐 System Architecture & Access URLs

Application / Service	Platform / Stack	Port / Access URL	Core Purpose
Backend REST API	Node.js / Express / In-Memory DB	`http://localhost:5000`	Core REST endpoints, auth, cron jobs, Smart Expiry engine
Customer Web App	React / Vite / Tailwind	`http://localhost:3000`	Desktop shopping, cart, checkout, household pantry management
Delivery Partner App	React / Vite / Tailwind	`http://localhost:3001`	Logistics console, order dispatch, status workflow, route review
Admin Web Panel	React / Vite / Tailwind	`http://localhost:3002`	Inventory management, category/product CRUD, sales reports
Mobile App	React Native (Android & iOS)	Android Emulator / Phone	Native customer & delivery agent app with zero-API offline fallback

🔑 Default Demo Credentials & Quick Switchers

User Role	Email Address	Password	Mobile 1-Tap Switcher
Customer User	`customer@example.com`	`password123`	Tap **Customer** button on Account tab
Delivery Partner	`delivery@example.com`	`password123`	Tap **Delivery** button on Account tab
System Administrator	`admin@example.com`	`password123`	Tap **Admin** button on Account tab

Module 1: Customer Module

FULFILLED & VERIFIED

ARCHITECTURE & IMPLEMENTATION:

- ✔ **User registration and login:** Implemented via `/api/auth/register` and `/api/auth/login` with JWT token generation and BCrypt encryption. Mobile app features native registration and local AsyncStorage credential caching.
- ✔ **Browse categories and products:** Dynamic category carousels and product catalogs. Products feature pricing, discounts, weights, and high-visibility **shelf-life tags** (e.g., `5d Shelf Life`).
- ✔ **Search and filter:** Real-time search query matching product names/descriptions, category filter chips, and sorting.
- ✔ **Add items to cart and wishlist:** State-managed Cart and persistent Wishlist with subtotal, taxes, and delivery fee calculation.
- ✔ **Place orders and make online payments:** Checkout workflow supporting multiple payment options, automatic order numbering (`PP-XXXXXX`), and simulated gateway callbacks.
- ✔ **Track order status:** Multi-stage progress tracking (`PLACED` → `CONFIRMED` → `PICKED_UP` → `OUT_FOR_DELIVERY` → `DELIVERED`).
- ✔ **View order history:** Chronological order logs with item breakdown, pricing, timestamps, and order detail drill-downs.
- ✔ **Manage profile and addresses:** Profile editing and address book with "+ Add New Address" modal and default selection.

STEP-BY-STEP TEST PROCEDURE:

1. Test Authentication:

Log in on Web (`http://localhost:3000/login`) or open Mobile App → Account tab → tap "Customer" in 1-Tap Demo Switcher.

> ✔ Successfully logged in. Customer profile and active delivery address are displayed.

2. Browse Categories & Products:

Tap category chips (*Dairy & Eggs*, *Fruits & Vegetables*). Observe product listing.

> ✔ Catalog updates instantly to show products in the selected category with shelf-life badges.

3. Test Search & Filter:

Type "Milk" or "Apple" in the search bar.

> ✔ Products filter in real-time matching the query string.

4. Test Cart & Wishlist:

Tap the heart icon on any product (adds to Wishlist). Tap "ADD" on 2 products → go to Cart tab → increment and decrement quantities.

> ✔ Subtotal, delivery fee (₹20), and final amount calculate accurately.

5. Place Order & Checkout:

In Cart, tap "Proceed to Checkout" → select delivery address → choose payment method → tap "Pay & Place Order".

> ✔ Order Success screen loads showing unique order ID (e.g. `PP-100914`).

6. Track Order Status:

Tap "Track Order" or go to Account → My Orders & Invoices → tap on the new order.

> ✔ Live timeline renders with active status highlighted.

7. Manage Addresses:

Go to Account → Saved Delivery Addresses → tap "+ Add New Address" → fill in details and save.

> ✔ New address appears in the list and can be selected as primary.

Module 2: Admin Module

FULFILLED & VERIFIED

ARCHITECTURE & IMPLEMENTATION:

- ✔ **Secure admin login:** Role-based access control checking `role === 'ADMIN'`. Non-admin users are rejected. Offline fallback support ensures uninterrupted portal access.
- ✔ **Manage product categories:** Full category CRUD via `/api/categories` with icons, banner images, and descriptions.
- ✔ **Add, update, and delete products:** Product catalog management via `/api/products` with SKU, shelf-life days, brand, stock, and pricing.
- ✔ **Manage inventory and stock:** Dedicated inventory view (`/api/inventory`) with threshold alerts for items with `stock < 10`.
- ✔ **View and process customer orders:** Order dispatch console allowing status transitions (`CONFIRMED`, `DISPATCHED`, `CANCELLED`).
- ✔ **Manage customers and delivery partners:** User directory with role filters and account activation/deactivation toggles.
- ✔ **Generate reports and monitor sales:** Analytics dashboard showing Total Revenue, Today's Orders, Low Stock Items, Expiring Soon alerts, and sales trend graphs.

STEP-BY-STEP TEST PROCEDURE:

1. Admin Authentication:

Open `http://localhost:3002` → Enter `admin@example.com` / `password123` → Click "Sign In to Dashboard".

> ✔ Dashboard opens displaying live metrics and sales analytics.

2. Category Management:

Click "Categories" in sidebar → Click "+ Add Category" → Enter name & description → Save.

> ✔ New category appears in the list and updates the catalog.

3. Product Catalog Management:

Click "Products" → Click "+ Add New Product" → Enter title, price, category, and **Shelf Life (Days)** → Save.

> ✔ Product is published and immediately available in customer apps.

4. Inventory & Low Stock Alerts:

Click "Inventory" → Locate an item marked with `LOW STOCK` → Click "Adjust Stock" and increase quantity.

> ✔ Stock updates and low-stock warning badge automatically clears.

5. Process Customer Orders:

Click "Orders" → Select a `PLACED` order → Update status to `CONFIRMED` or `DISPATCHED`.

> ✔ Order status updates across both Customer and Delivery Partner apps.

6. User Management:

Click "Users" → Filter by Customer or Delivery Partner → Click "Toggle Status".

> ✔ User status flips between Active and Inactive.

7. Sales Reports:

Click "Reports" in sidebar to review revenue breakdowns and order volume trends.

> ✔ Charts render financial statistics and order fulfillment metrics.

Module 3: Delivery Partner Module

FULFILLED & VERIFIED LIVE

ARCHITECTURE & IMPLEMENTATION:

- ✔ **Delivery partner login:** Dedicated portal and mobile authentication mode for delivery agents.
- ✔ **View assigned orders:** Real-time queue displaying customer details, delivery location, phone number, and package items.
- ✔ **Accept or reject delivery requests:** Interactive action buttons allowing drivers to accept new requests or decline them to release back into the regional pool.
- ✔ **Navigate to customer location:** Integrated `🗺️ Navigate to Customer Location` deep-link opening Google Maps coordinates with one click.
- ✔ **Update delivery status:** Sequential state machine transitions (`📦 Order Picked Up from Hub` → `🛵 Out for Delivery` → `✓ Complete Delivery`).
- ✔ **View delivery history:** Dedicated "Delivery History" tab showing completed orders, trip fees (₹45.00/trip), and Smart Expiry synchronization confirmation.

STEP-BY-STEP TEST PROCEDURE:

1. Delivery Partner Login:

On Mobile: Go to Account → tap "Delivery" in 1-Tap Switcher → tap "Delivery Partner Portal" (or visit `http://localhost:3001`).

> ✔ Delivery Partner Portal opens with "Status: Active & Online 🟢".

2. View Assigned Orders:

Ensure "Active Deliveries" tab is selected.

> ✔ Order card displays order number (e.g. `#R_100914`), customer name, address, and items.

3. Customer Navigation & Contact:

Tap "🗺️ Navigate to Customer Location" → Verify Google Maps deep-link. Tap "📞 Call" → opens phone dialer.

> ✔ External navigation opens with exact customer coordinates.

4. Status Transitions:

Tap "📦 Order Picked Up from Hub" → then tap "🛵 Out for Delivery" → finally tap "✓ Complete Delivery".

> ✔ Confirmation dialog indicates "Status Updated to DELIVERED". Order moves to Delivery History.

5. View Delivery History:

Tap the "Delivery History" tab pill.

> ✔ Completed orders appear showing DELIVERED badge, Trip Fee: ₹45.00, and notice: Successfully Delivered & Synced with Customer's Smart Expiry.

Module 4: Payment Module

FULFILLED & VERIFIED

ARCHITECTURE & IMPLEMENTATION:

- ✔ **Secure online payment integration:** Simulated Razorpay payment gateway integration on mobile and web (`/api/payments/verify`).
- ✔ **Multiple payment options:** Full support for **UPI** (Google Pay, PhonePe, Paytm, BHIM), **Credit/Debit Cards**, **Net Banking**, and **Cash on Delivery (COD)**.
- ✔ **Payment confirmation & transaction history:** Instant payment verification callbacks, unique transaction IDs (`txn_XXXXXX`), payment status badges (`PAID`, `PENDING`), and receipts on invoices.

STEP-BY-STEP TEST PROCEDURE:

1. Test Payment Method Selection:

In Cart, tap "Proceed to Checkout". Under "Payment Method", test selecting between UPI, Card, Net Banking, and COD.

> ✔ Radio indicator updates to reflect the active payment mode.

2. Process Online Payment:

Select "Razorpay / UPI" and tap "Pay & Place Order".

> ✔ Gateway verifies payment, status transitions to `PAID`, and confirmation screen displays green `PAID` badge.

3. Verify Transaction Record:

Open order details → tap "View Tax Invoice".

> ✔ Invoice displays Payment Mode (e.g. `RAZORPAY_UPI`), Subtotal, Taxes, and Total Paid.

Module 5: Notification Module

FULFILLED & VERIFIED

ARCHITECTURE & IMPLEMENTATION:

- ✔ **Order confirmation notifications:** Auto-dispatched when checkout completes (`type: 'ORDER'`).
- ✔ **Payment status updates:** Triggered upon payment verification (`type: 'PAYMENT'`).
- ✔ **Delivery status notifications:** Generated when orders transition to `PICKED_UP`, `OUT_FOR_DELIVERY`, or `DELIVERED` (`type: 'DELIVERY'`).
- ✔ **Promotional offers & discounts:** Promotional announcements and seasonal discount alerts (`type: 'PROMO'`).
- ✔ **Expiry reminder notifications:** Dispatched by the Smart Expiry engine when items have ≤ 2 days of shelf life remaining (`type: 'EXPIRY'`).

STEP-BY-STEP TEST PROCEDURE:

1. View Notifications:

Tap the Notification Bell icon in the top navigation bar.

> ✔ Notifications list displays all alert categories with distinct icons.

2. Verify Real-Time Alerts:

Place a new order → Return to Notifications.

> ✔ New notification appears: "Order Placed Successfully! Your order has been received."

3. Test Mark as Read:

Tap on an unread alert or tap "Mark All as Read".

> ✔ Unread badge count clears to 0.

Module 6: Order Management Module

FULFILLED & VERIFIED LIVE

ARCHITECTURE & IMPLEMENTATION:

- ✔ **Order placement and confirmation:** Multi-item checkout generating structured orders with line items, prices, shipping address, and unique `PP-XXXXXX` order ID.
- ✔ **Order cancellation (before dispatch):** Customer-facing "Cancel Order" action enabled while the order is in `PLACED` or `CONFIRMED` status. Once dispatched/delivered, cancellation is safely locked.
- ✔ **Order tracking:** Visual vertical tracking timeline with active status pulses.
- ✔ **Invoice generation:** Formatted GST tax invoice modal showing itemized breakdown, tax rates, business details, customer address, and print/download action.
- ✔ **Order history management:** Full order archive allowing customers to review past orders, items ordered, and re-download invoices.

STEP-BY-STEP TEST PROCEDURE:

1. Test Order Cancellation (Before Dispatch):

Place an order → go to Account → My Orders & Invoices → tap on the order → tap red "Cancel Order" button → confirm.

> ✔ Order status updates immediately to CANCELLED with red badge.

2. Test Cancellation Lock (After Dispatch):

View an order in `OUT_FOR_DELIVERY` or `DELIVERED` status.

> ✔ "Cancel Order" button is hidden/disabled since the order is already in transit.

3. View & Print Tax Invoice:

Open any completed order → tap "View Tax Invoice".

> ✔ Formatted invoice modal renders with GST number, billing address, line items, and Download button.

Module 7: Smart Expiry Reminder Module

FULFILLED & VERIFIED LIVE

ARCHITECTURE & IMPLEMENTATION:

- ✔ **Automatic purchase synchronization:** Completed grocery orders automatically transfer items into the user's Smart Expiry tracker with calculated shelf lives.
- ✔ **Estimated expiry dates calculation:** Category-based shelf life engine (Milk = 5 days, Bread = 7 days, Eggs = 21 days, Apples = 14 days) automatically computes `estimatedExpiryDate = purchaseDate + shelfLifeDays`.
- ✔ **Send reminder notifications:** Background midnight cron job checks database daily and sends high-priority notifications for items expiring within 48 hours.
- ✔ **Display Fresh, Expiring Soon, and Expired products:**
  - ✔ 🟢 **Fresh** (≥ 3 days remaining)
  - ✔ 🟡 **Expiring Soon** (1 - 2 days remaining)
  - ✔ 🔴 **Expired** (≤ 0 days remaining)
- ✔ **Food waste reduction analytics:** Live waste reduction metrics ("85% Waste Prevented", "₹640 Saved") and recipe suggestions for items expiring soon.
- ✔ **Expiry history logs:** Historical records of consumed, expired, and discarded items preserved in database (`/api/expiry/history`).
- ✔ **Household grocery inventory management:** Dedicated **Household Pantry** tab with custom item addition, storage zones (**Fridge**, **Pantry**, **Freezer**), and "Mark as Consumed" actions.

STEP-BY-STEP TEST PROCEDURE:

1. Test Automatic Purchase Sync:

Place an order containing Milk and Eggs → open the "Expiry Tracker" tab.

> ✔ Milk (5d shelf life) and Eggs (21d shelf life) appear with countdown timers.

2. Test Status Classification Tabs:

Tap the filter pills: "Fresh", "Expiring Soon", and "Expired".

> ✔ Items are correctly segmented by days remaining with green, yellow, and red badges.

3. Test Household Pantry Manual Addition:

Tap "Pantry" tab → tap "+ Add Pantry Item" → enter "Greek Yogurt", shelf life 4 days, storage "Fridge" → save.

> ✔ Item is added to household pantry and synchronized with Expiry Tracker.

4. Test Storage Zones:

Switch between Fridge, Pantry, and Freezer storage filter pills.

> ✔ Only items stored in that physical kitchen location are displayed.

5. Test Consume & Waste Reduction:

Tap "✓ Used / Consumed" on an item.

> ✔ Item moves to consumed history and waste reduction savings metric increments.

📋 Complete Verification Summary Checklist

Module Number & Name	Requirements Status	Zero-API Offline Fallback	Live Verified Surfaces
Module 1: Customer Module	**100% Complete**	✔ Yes (AsyncStorage mock store)	Mobile App & Web (`:3000`)
Module 2: Admin Module	**100% Complete**	✔ Yes (Local Admin session)	Web Admin Panel (`:3002`)
Module 3: Delivery Partner Module	**100% Complete**	✔ Yes (Offline dispatch pool)	Mobile App & Web (`:3001`)
Module 4: Payment Module	**100% Complete**	✔ Yes (Simulated verification)	Mobile & Web Checkout
Module 5: Notification Module	**100% Complete**	✔ Yes (Local alerts store)	Mobile App & Web Navbar
Module 6: Order Management Module	**100% Complete**	✔ Yes (Local order store & invoice)	Mobile App & Web Orders
Module 7: Smart Expiry Reminder Module	**100% Complete**	✔ Yes (Local shelf-life engine)	Mobile Expiry & Pantry Tabs
